### EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Ira Schultz on 05-24-2005.

The application has been amended as follows:

The abstract has been amended as follows:

--A gastric band implant characterized in that a strap constituted by an elongate piece is secured to the inside of an inflatable bag. The width and thickness of the piece are smaller than the corresponding dimensions of an oblong right cross-section of the bag. The piece possesses convex longitudinal edges and has complementary overlapping connection structures on opposite end portions of the strap.--.

On page 10 of the specification line 23, "ambit" has been changed to --limit--.

In claim 1 (currently amended) line 9, "means enabling it" has been changed to -- end portions enabling the strap--.

In claim 6 (currently amended) line 5, the 1<sup>st</sup> "the" has been changed to --a--.

In claim 7 (currently amended) line 5, "one of the closed ends of the strap" has been changed to -- the other end--, and in lines 6 and 7, "second closed end of said strap" has been changed to --closed end of said bag--.

The above amendments were made to correct indefiniteness or typographical errors, and to formalize the abstract.

The following is an examiner's statement of reasons for allowance: the prior art does not disclose or fairly suggest a gastric band implant having a flexible but not stretchable strap coupled to an inflatable bag; the bag is closed at one end and communicates at another end with a tube connected to a box with a self-sealing membrane; the strap being an elongate piece secured to the inside of the bag, the bag being shaped to have a right cross-section that is oblong with parallel plane sides interconnected by convex edges; the strap has a right cross-section which is oblong, the greatest width being substantially equal to the width of one of the plane sides, the piece having convex longitudinal edges and the implant also including overlapping connection means between the ends of the strap.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Glenn K. Dawson whose telephone number is 703-308-4304. The examiner can normally be reached on M-Th 7:30-5:00.
